Now that you have subscribed to all the forums and got acquainted with the Moodle learning environment, it is time to install the SAP GUI software.

In the following chapter you are guided through the installation of the SAP GUI. SAP JavaGUI users should refer to the installation guides provided with the JavaGUI software.

## Installation of the SAP-GUI

1. Download the **SAP-GUI** from the *Download Area - Software* of this course. You need two files: the SAP-GUI and the SAP-Logon.

### Download Area - Software

In this area you will find all the software you need for this course.

Figure 1: SAP Installation: Download Software

1. After the download is finished, Extract the downloaded Archive **01-SAPGUI-wBI.zip** to your harddrive using any standard extraction program. Therefore, right-clicking on the archive and select, e.g. *Extract here*.

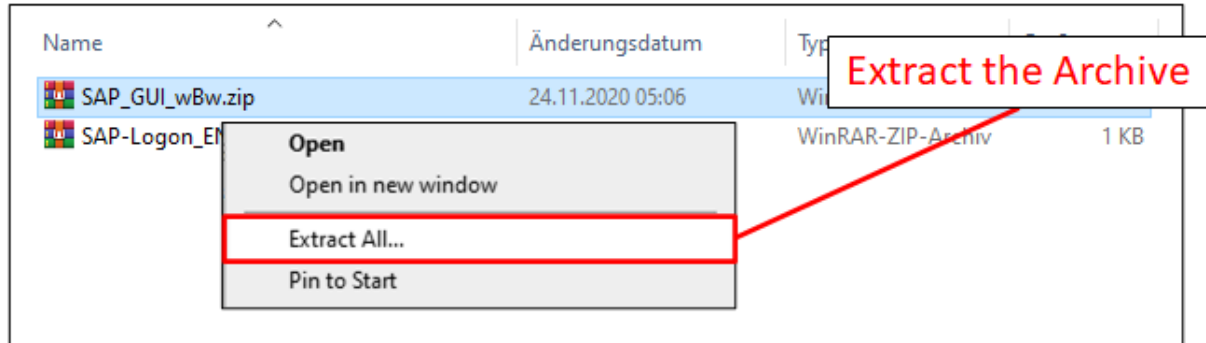

Figure 2: SAP GUI Installation: Extract Archive

2. After the extraction is completed, right-click on the extracted **SAP\_GUI-exe** file and select *Run as Administrator*. Confirm the message issued by your operating system.

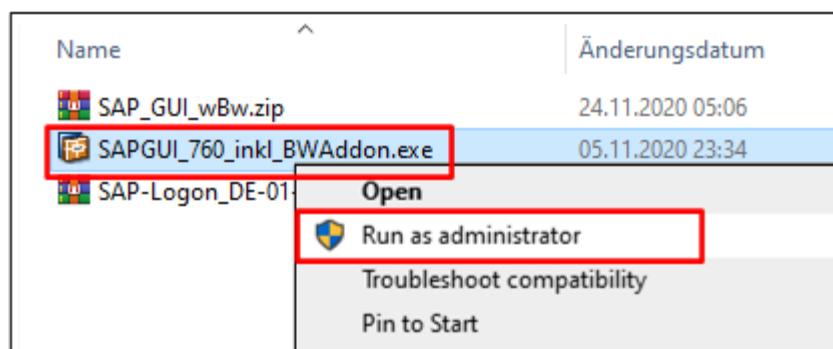

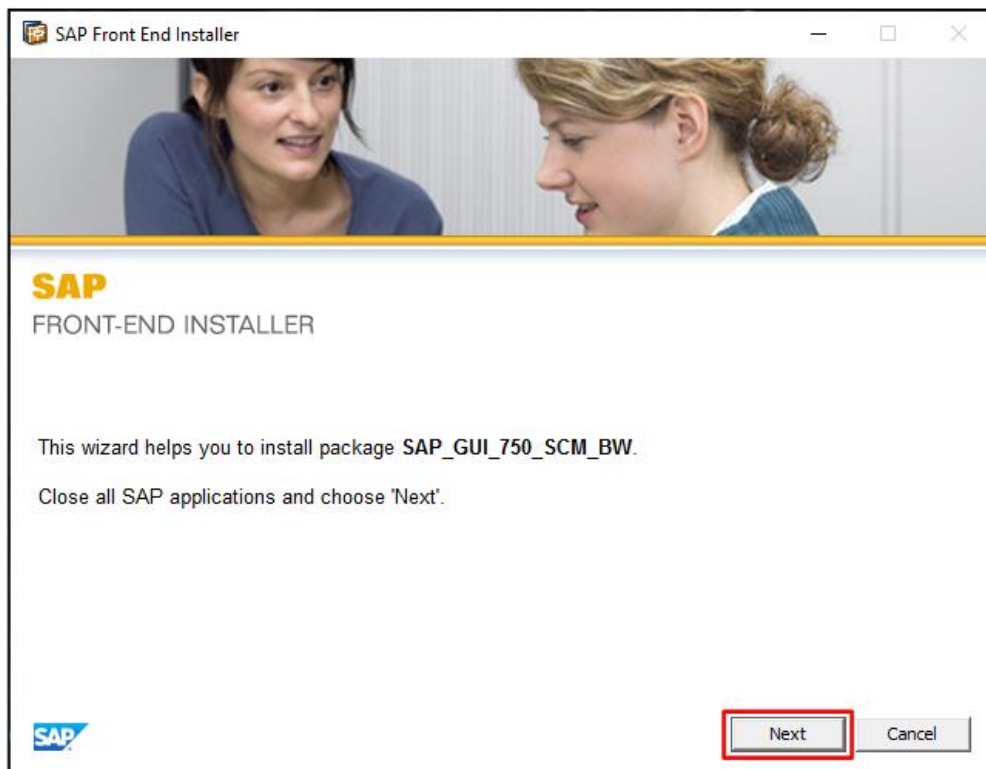

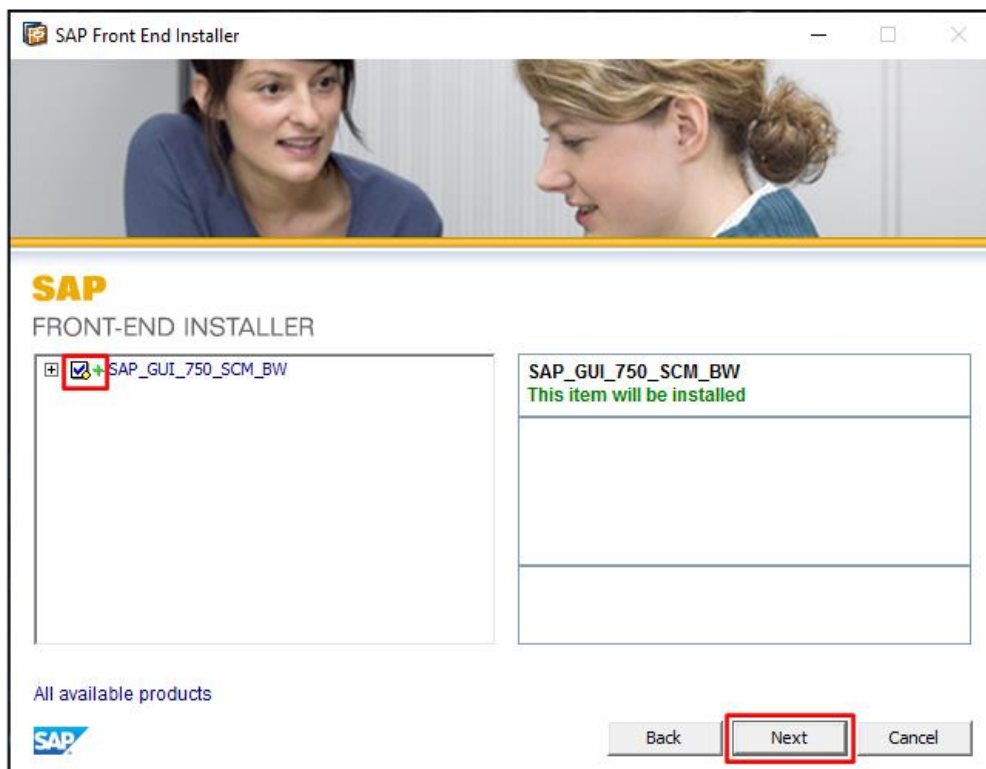

Figure 3: SAP GUI Installation: Execute Setup

3. Click **Next** on the following Installation screen.

**Figure 4: SAP Installation**

4. Now you should see the following screen. Select the item "SAP\_GUI\_750\_SCM\_BW" and press **Next** (multiple times) until the installation starts.

**Figure 5: SAP Installation: Select Software Components**

**Note:** If your Windows installation is not equipped with the latest .Net-Framework of Microsoft, you will get a note in the field on the right side. If this is the case, update the .Net Framework from the web-site of Microsoft. Choose one of the links in the field (x86 → standard OR x64 → 64 bit) depending on your Windows Operating System.
